

JOIN US IN CELEBRATING
the
Michigan Department of Education
21st Century Community Learning Centers
NASA STEM Challenge Showcase
at
Impression 5 Science Center
200 Museum Drive, Lansing, MI
March 30, 2017
3:00-5:00 p.m.

The Michigan 21st Century Community Learning Centers (21st CCLC) program collaborated with NASA to help students in some of the nation's highest-need schools learn about Science, Technology, Engineering and Math (STEM). Participating student teams solved real-world engineering design challenges with assistance and mentoring from NASA scientists and engineers. 150 students from Grand Rapids Public Schools, Genesee School District, Kalamazoo Public Schools, Kentwood Public Schools, Muskegon Public Schools, Mt. Morris Consolidated Schools, Wayne-Westland Community School District, and Westwood Heights Schools were selected to participate in the challenges.

We hope that you will join us on March 30th at Impression 5 Science Center where the students will showcase their design challenge solutions. Admission is free and light snacks will be served.
